WORK EXPERIENCE

Full Stack Web Developer

Vyapardost Pvt. Ltd

07/2023 - Present

In the role of Full Stack Web Developer at Vyapardost Pvt. Ltd, responsibilities include designing, implementing, and maintaining robust web applications that enhance user engagement and streamline operations. This position demands proficiency in a variety of technologies, particularly JavaScript, Node.js, and MySQL, ensuring high performance and responsiveness of applications. Collaboration with cross-functional teams is essential to align project goals with business objectives, while also adhering to industry best practices for coding and testing.

Contact : Sudarshan Mane - <https://www.linkedin.com/in/sudarshanmane/>

Full Stack Web Intern

Bixlash Pvt. Ltd,

04/2023 - 07/2023

Rishikesh, Dehradun

During the internship as a Full Stack Web Intern at Bixlash Pvt. Ltd, the focus was on gaining practical experience in web development processes, including both frontend and backend technologies. Engaged in various projects that required the application of JavaScript, React.js, and Node.js, fostering a deeper understanding of the development lifecycle. This role included collaborating with senior developers to refine coding skills and contribute to live projects, enhancing both technical and problem-solving abilities. Assisted in the development of a dynamic web application, contributing to UI/UX design and implementation.
