Work Experience

Full Stack web Intern @ Vyapardost, Remote ⧉

Aug 2023 - Present (12.5 months) | Full-time

cuvette helped me get this internship

- I played a key role in developing a digital procurement platform aimed at streamlining the procurement process for organizations. My primary responsibilities included building the frontend UI using Next.js and integrating it with a Nest.js backend, ensuring a seamless and intuitive user experience.

- In addition to frontend development, I contributed to backend logic design, database management, and testing, which ensured the platform's stability and efficiency. My work involved handling complex workflows and maintaining data integrity across the system.

- Collaborating closely with mentors and team members, we delivered a solution that automates requisition approvals, RFQ generation, and order management. This significantly enhanced operational efficiency and provided users with a robust, user-friendly platform.

Skills Developed: NestJS, NextJs, MongoDB, API, UI/UX, Redux, Git, Github, Problem solving

Team Members: Devesh Verma (Co-Founder & CTO @ Vyapardost), Sudarshan Mane (Founder@ Vyapardost)
